

Tzu-Ming Harry Hsu

徐子旻

Physical AI Researcher

World Models, Embodied AI, and Robot Learning

h@stmharry.io

+1 617-803-7785 / +886 928-494-198

- Member of Technical Staff at Moonlake AI building simulation infrastructure for robotics, autonomy, and physical AI.
- MIT-trained Ph.D. and Google Federated Learning core contributor, with YFLOP-scale experimentation infrastructure and open-source research artifacts.
- Founder-operator with capital-raising, team-building, and production ML experience across data, training, evaluation, and scalable inference.
- International Physics Olympiad world champion, bringing first-principles problem solving to ambitious technical systems.

Education

Massachusetts Institute of Technology

Ph.D., Computer Science

Jun 2020 – Jun 2022

Cambridge, MA

- *Advisor:* Peter Szolovits
- *Research areas:* Computer vision, federated learning, machine learning for healthcare

Massachusetts Institute of Technology

S.M., Electrical Engineering and Computer Science

Sep 2017 – May 2020

Cambridge, MA

- *Advisors:* Peter Szolovits, Fadel Adib
- *Research areas:* Computer vision, machine learning, wireless signal, signal processing

National Taiwan University

B.S., Physics; B.S.E., Electrical Engineering

Sep 2011 – Jun 2016

Taipei, Taiwan

- *Class rank:* 1/190
- *GPA:* 3.99 / 4.00

Professional Experience

Moonlake AI

Member of Technical Staff

Jul 2026 – Present

San Francisco, CA

Build simulation and evaluation infrastructure for robotics, autonomy, and physical AI, spanning world generation, robot-learning environments, and policy evaluation.

Dentscape

Machine Learning & Software Engineering Consultant

Apr 2025 – Apr 2026

San Francisco, CA / Taipei, Taiwan

Built data, training, and evaluation systems for AI-assisted dental design, combining geometric ML, pre-labeling workflows, preference modeling, and production deployment improvements.

- Reorganized a fragmented ~10 TB dental dataset into a standardized ~4 TB ML-ready registry, reducing raw-data access from ~3 days to minutes.
- Rebuilt pre-labeling and labeling loops for 100-200 case batches, reducing turnaround from ~4 weeks to ~1 week and improving experiment velocity.
- Implemented bilevel/meta-learning for personalized crown generation and improved preference fit by ~20% while keeping the system production-facing.
- Optimized segmentation and crown-generation services for ~110% aggregate throughput improvement while reducing infrastructure cost by ~50%.

Clarq AI*Co-founder & CTO*

Dec 2024 – Jun 2026

Palo Alto, CA / Taipei, Taiwan

Helped reposition Clarq from a hardware product into a force-intelligence platform, framing a long-term moat around force-time data, evaluation loops, model-driven product decisions, and fundraising.

- Co-led technical positioning around a three-layer strategy: hardware wedge, SaaS profit engine, and long-term data/model moat.
- Drove US-facing investor outreach and progressed pre-seed conversations toward near-commit stage with angels.
- Supported Startup Island Taiwan Silicon Valley program participation and international expansion narrative.
- Aligned product roadmap, data strategy, and investor-facing story across Taiwan hardware operations and US capital market expectations.

CodeGreen Labs PBC*Co-founder & CTO*

Sep 2023 – Nov 2024

Boston, MA / Taipei, Taiwan

Led a 10-person engineering organization delivering auditable data systems for enterprise partners, reaching projected \$1MM annual revenue while hardening integration, compliance, and delivery operations.

- Reached projected annual revenue of \$1MM USD by Q2 2024 with a 10-person team.
- Established partnerships with Microsoft, Global Blockchain Business Council, Gold Standard, SDG Data Alliance, and PVBLC.
- Built a cross-functional team across product, partnerships, and engineering to address complex data, auditability, and compliance challenges.
- Designed and shipped data-intensive systems with end-to-end auditability, regulatory compliance, and interoperability with existing partner ecosystems.

Hashgreen Labs*Co-founder & CTO*

Sep 2022 – Aug 2023

Boston, MA / Taipei, Taiwan

Built and led a 20-person engineering organization, raised \$1MM+ in capital, and shipped client-facing data and transaction systems while establishing hiring, delivery, and product operating cadence from zero.

- Raised over \$1MM USD in capital and grew the team from 0 to 20 employees.
- Built hiring, onboarding, and performance review systems to support a high-performing engineering organization.
- Secured and delivered high-impact projects for clients including The World Bank and Chia Network.
- Led development of DeFi protocols (DEX and AMM), becoming the first team on the Chia blockchain to launch these primitives.

International Academia of Biomedical Innovation Technology*Consultant & Convener*

2021 – Jun 2026

Taipei, Taiwan

Supported a 50+ member biomedical innovation community through project mentorship, dental AI research collaboration, and large-scale technology outreach events.

- Helped grow a community of 50+ members while supporting 8+ academic projects and 15+ publications.
- Led a dental AI research team in collaboration with National Taiwan University Hospital.
- Co-organized demo events with 100+ participants to showcase biomedical technologies and educate the broader community.

Massachusetts Institute of Technology*Research Assistant*

Sep 2018 – Jun 2022

Cambridge, MA

Led research on deployable medical AI, computer vision, and learning under data constraints, producing 20+ publications, patents, and theses with translational partners across industry and healthcare.

- Published 14 conference articles, 5 journal articles, one U.S. patent, and two degree theses.
- Served as a peer reviewer for 8 conferences and journals, reviewing 34 articles.
- Received media coverage from CBS, Engadget, TechCrunch, and MIT News.
- Collaborated with Google, Takeda Pharmaceutical, and Beth Israel Deaconess Medical Center.

- Awarded scholarships totaling 4 years in duration.

WorldQuant

Data Science Intern

Jun 2021 – Aug 2021

Taipei, Taiwan

Improved an existing quantitative strategy by +1.5% market correlation through targeted modeling and optimization work.

Digital Drift

Lead Machine Learning Scientist

Mar 2016 – Mar 2020

Taipei, Taiwan

Built and deployed deep learning systems and backend APIs that moved computer vision features from experimentation into production mobile experiences.

- Built deep neural networks for cuisine recognition and matching using TensorFlow on multi-GPU machines.
- Designed and maintained backend APIs to serve model predictions in production settings.

Google

Software Engineer Intern

Jun 2020 – Sep 2020

Remote

Contributed production software and experimentation tooling that improved reliability and iteration speed for applied machine learning workflows.

Google

Researcher

Jun 2019 – Mar 2020

Seattle, WA / Cambridge, MA

Built large-scale ML experimentation infrastructure spanning 1,000+ GPUs and 1M+ machine hours, and published 2 peer-reviewed papers in deep federated learning with open-source outputs for broader adoption.

- Conducted foundational research in deep federated learning, contributing to early growth of the field.
- Published 2 peer-reviewed papers and presented findings at top conferences and workshops.
- Developed a scalable experimentation library running on thousands of machines and 1,000+ GPUs (over 1M machine hours).
- Open-sourced research code and datasets for broader community use.

Brigham and Women's Hospital

Research Trainee

Mar 2019 – Feb 2020

Boston, MA

Contributed hospital-facing medical-imaging ML work on risk prediction and deployment-oriented evaluation using real patient cohorts and radiology workflows.

- Supported model development and validation analysis for clinical imaging applications tied to operational hospital use cases.

Beth Israel Deaconess Medical Center

Research Trainee

Nov 2019 – Oct 2020

Boston, MA

Published impactful clinical AI research and deployed a PACS-integrated screening workflow across 1,000+ patients while managing shared deep-learning compute for a 10+ member research unit.

- Published three impactful research articles on critical medical topics, including liver tumor assessment, COVID-19 clinical risk prediction, and automatic pancreatic cancer assessment.
- Developed and implemented an AI-driven patient screening pipeline in the hospital's PACS workflow, screening over 1,000 patients and improving disease diagnosis accuracy.
- Managed the computation resources for a research unit of 10+ members, streamlining deep learning processes and maximizing resource sharing.

Academia Sinica

Student Researcher

Feb 2014 – May 2016

Taipei City, Taiwan

Researched heterogeneous, unsupervised, and semi-supervised domain adaptation for visual classification and published three peer-reviewed papers presented at top conferences and workshops.

- Researched heterogeneous, unsupervised, and semi-supervised domain adaptation for visual classification.
- Published 3 peer-reviewed academic papers and presented findings at top conferences and workshops.

Olympiad Tutoring Community

Private Tutor

Sep 2011 – Jun 2015

Taipei, Taiwan

Mentored advanced physics students from fundamentals through competition-level performance, including pathways to Taiwan's national Olympiad representation.

- Mentored students who became Taiwan national representatives in the International Physics Olympiad (IPhO).

Leadership Experiences

Federation of Taiwanese Student Associations in New England (FT-SANE)

2019 – 2020

Activities Officer

Boston, MA

MIT Taiwanese Student Association

2018 – 2019

President

Boston, MA

- Led coordination of 20+ events for a diverse community of over 100 members.
- Organized 10+ career workshops and helped plan 10+ national holiday celebrations.

Awards & Honors

Departmental Valedictorian (First Place at Graduation)

2016

Department of Electrical Engineering, National Taiwan University

Taipei, Taiwan

- Placed 1st among 200 classmates across all courses.

Silver Medal

2015

Altera Innovate Asia FPGA Design Competition

Taipei, Taiwan

- Placed 2nd among 20 international teams.
- Designed a product named EZBud with integrated algorithms that modulate music based on user sporting statistics.

Gold Medal / Overall Winner

2011

42nd International Physics Olympiad (IPhO)

Bangkok, Thailand

- Represented Taiwan and placed 1st in theory, experiment, and combined rankings among 400+ participants from 80+ countries.

Gold Medal / Experiment Winner

2011

12th Asian Physics Olympiad (APhO)

Tel Aviv, Israel

- Placed 1st in the experiment section among 100+ participants.

Gold Medal

2010

41st International Physics Olympiad (IPhO)

Zagreb, Croatia

Gold Medal / Experiment Winner

2010

11th Asian Physics Olympiad (APhO)

Taipei, Taiwan

- Placed 1st in the experiment section among 100+ participants.

Gold Medal

2008

5th International Junior Science Olympiad (IJSO)

Changwon, Korea

- Performance Frontier in Freediving: An Exploratory Analysis** 2026
AIDA Instructor Thesis
TMH Hsu, J Chang
- USE: Uncertainty Structure Estimation for Robust Semi-Supervised Learning** 2026
arXiv Preprint arXiv:2603.00404
Tsao-Lun Chen, Chen-Lin Liu, Tzu-Ming Harry Hsu, Tai-Hsien Wu, Ching-Chang Fu, Hsuan-Yi Eric Chou, Shun-Fa Su
- Artificial Intelligence to Assess Dental Findings from Panoramic Radiographs—A Multinational Study** 2025
